

NPBU DIAGNOSTICS™ INSTALL INSTRUCTIONS

1. Download .zip file to local machine
2. Unzip and install to machine (D-account Required)
3. Ensure the appropriate Device Driver is installed for your Datalink Adapter

SUPPORTED DEVICES

- RP120C compliant devices (must be 64 bit)
- IXXAT
- PEAK
- EMS Thomas Wunche

USER LOG-IN

- Users must have a valid Cummins login (same login as Guidanz® Mobile)
- OEM users that do not already have an account will need an account created for them.
 - Be sure to indicate this on the license request form.

REQUEST A LICENSE

- To request a license fill out the license request form located [HERE](#)
- License requests shall be reviewed and assigned based on user response.
- Once approved, license files will be emailed to the user.
- License files should be kept on the users local machine (desktop recommended)

LAUNCH APPLICATION

- Initial Launch of the application will prompt user for a license file to activate the tool.
- Point the tool to the appropriate license file and click activate
- The tool will update the program Name, Status, and Expiration Date
- License files must be added individually
- License activation window can be accessed via the Help Window (to view expiration date or activate additional licenses).
